

ecoPowerTrolley

Capacity	Output	Weight	IP Protection
8.9 kWh	13 kW	80 kg	IP65

Save Lives. Saves Time. Saves the Environment.

Power when it matters: The ecoPowerTrolley delivers emission-free, silent electricity – with no long setup times. Whether in natural disasters, technical rescue operations, or firefighting missions, this mobile battery storage unit is reliable, quick, and flexible – even in sensitive environments such as residential areas or hospitals.

Zero emissions

No exhaust fumes, noise, or fossil fuels: With the ecoPowerTrolley, you rely on a sustainable, climate-friendly power supply. This protects the environment and reduces the ecological footprint of your operations.

Powerful and mobile

The ecoPowerTrolley provides reliable energy for your rescue missions. With up to 13 kW of power and over 7 hours of runtime, it is the perfect solution for:

- Submersible pumps** during floods
- Hydraulic rescue tools** such as cutters and spreaders
- Lighting masts** for nighttime operations
- Mobile sirens** for hazard warnings
- Smoke ventilators** with up to 200,000 m³/h airflow

Your benefits at a glance:

- Emissions-free:** No noise, no exhaust – ideal for sensitive locations
- Quickly ready for use:** Integrated wheels and compact design make it easy to transport anywhere
- Maintenance-free:** No fossil fuels, no lubricants – just plug-and-play
- Versatile:** 230 V and 400 V connections for various devices
- Fast charging:** Fully recharged in just 2 hours

Why choose the ecoPowerTrolley?

The ecoPowerTrolley is the ideal solution for operations in remote areas. Its efficient technology reduces operating costs compared to diesel generators and impresses with silent operation – perfect for night work or noise-sensitive environments.

Let us convince you – we look forward to your inquiry.
